B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND: The site consists entirely of an approximately 20.01 acre surface mining operation. Per 51 FR, 41217, "water-filled depressions created in dry land incidental to construction activity and pits excavated in dry land for the purpose of obtaining fill, sand, or gravel unless and until the construction or excavation operation is abandoned and the resulting body of water meets the definition of waters of the United States" and thus this feature is non-jurisdictional. Desk information also indicated that there are no hydric soils, hydrophytic vegetation or wetland hydrology on the property. The property lies wholly within an upland and is non-jurisdictional.

¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.
