_____ (Signature of person authorized to sign)			BY _____ (Signature of Contracting Officer)		15-Mar-2001

SECTION M Evaluation Factors for Award

CLAUSES INCORPORATED BY FULL TEXT

SECTION M. EVALUATION FACTORS FOR AWARD

M.1. Government Intent Relating to Award. It is the Government's intent to award one cost plus award fee contract pursuant to this solicitation.

M.2. Inspection of Offeror's Equipment. If an offer submitted in response to this solicitation is favorably considered, a survey team may contact the offeror and arrange for the inspection of equipment proposed by the offer.

M.3. Evaluation and Selection Procedures. Selection of a Contractor will be made by an integrated assessment of the proposals submitted and in light of the following criteria. The integrated assessment will involve a determination by the Government of the overall merit of each offeror's proposal, recognizing that subjective judgment on the part of the Government evaluators is implicit in the entire process.

* All offeror's proposals will be evaluated for technical quality and quantity and assigned an adjective rating based upon the criteria set forth herein. *

A cost/price analysis will be performed.

If no award on initial offers is made under the authority of the Provision entitled, "Instructions To Offerors - Competitive Acquisition (FEB 2000)" in Section L. of this solicitation, then the procedures of FAR Subpart 15.3-Source Selection will be followed in making a recommendation for award which will be provided to the Contracting Officer as a basis for final determination.

Award will be made to the offeror whom the Government determines will be able to accomplish the necessary work in the manner most advantageous to the Government. The evaluation of technical capabilities will be accomplished without reference to cost.

All evaluation factors other than cost or price, when combined, are significantly more important than cost or price.

All factors and significant sub factors that will affect contract award are listed below.

M.3.1. Evaluation of Technical Capability. The technical aspects of the proposal will be evaluated on the following topics. These factors are listed in descending order of importance.

a. Management Capability. The offeror must demonstrate that he/she has sufficient capability to manage the work required by this contract.

b. Experience and Technical Expertise of Key Personnel in descending order of importance:

- (1) Off-Site Management

- (2) Project Superintendent
- (3) Foremen
- (4) Industrial Electrician and Industrial Mechanic

c. Equipment. The offeror must demonstrate the equipment capability required by the contract.

d. Staffing. The offeror must demonstrate that he/she has sufficient numbers of personnel and sufficient skill diversity to accomplish the requirements of the contract.

* e. Experience of Firm (Past Performance). Each type of experience listed below will be given equal consideration in evaluation: *

(1) Similar contracts successfully completed and performed in a satisfactory manner.

(2) Similar contracts which are on going.

f. Proposed budgetary and cost accounting systems.

M.3.2. Evaluation of Cost Proposals. Cost proposals will not be scored, but will be evaluated for reasonableness by cost/price analysis. The total estimated contract cost will be considered as an independent element from the technical evaluations. Cost proposals will be reviewed for completeness, credibility, and compatibility with the proposed technical capability. Additional details concerning evaluation of the cost proposals is furnished as follows:

M.3.2.1. Completeness of Cost Proposals. Cost/price proposals will be evaluated to determine the extent to which all cost elements of the offer have been addressed. This evaluation will determine the adequacy of the offer in fulfilling the requirements of the solicitation in areas such as, but not limited to, contract requirements, compliance with PL 87-653, etc.

M.3.2.2. Realism of Cost Proposals. Cost proposals will be evaluated for realistic compatibility with the work to be performed; a clear understanding of the contract requirements; and consistency with the various elements of the offeror's technical proposal.

M.4. RELATIONSHIP OF ACCEPTED PROPOSAL CONTENT TO THE CONTRACT REQUIREMENTS. By acceptance of an offeror's proposal, the Government does not warrant that the capability presented by the offeror will, at all times, be sufficient to perform the required work. However, by the submission of an offer pursuant to this solicitation, you, as the offeror, agree that the capability presented in your proposal which is in excess of the minimum capability requirements of this solicitation, as accepted by the Government, and upon award of a contract, thereby becomes an additional contract requirement for equivalent capability. Subsequently, a failure to provide such additional capability, which results in deficient contract performance, can place the contract in jeopardy of default.
