- Table A181 identifies visual with proximity to proposed Work Items.
- When viewing this table, the green rows indicate a decreased risk of indirect impacts to visual resources. The orange rows indicate an increased risk of indirect impacts to visual resources.
- An inventory was collected during March 2020 through GIS reference, website reference, and aerial imagery. The inventory is an accurate representation of visual resources available at the time, but visual resources near each work item is not limited to this list.
