(1) No local service facilities are required for the project.

(2) Percentage is based on ratio of scheduled GNF construction cost in each year to total cost of GNF construction.

(3) Estimated non-Federal credits include participation on the project coordination team and non-Federal audits necessary to comply with the Single Audit Act Amendment of 1996 and OMB Circulars A-87 and A-133.

(4) The second 10% paid over time is not applicable since the non-Federal share including the voluntary contribution of \$615,000 causes the non-Fed share to exceed the 20 percent of GNFAs required by law.

(5) Excludes Federal planning costs of \$100,000. Total Federal expenditures, including planning are limited to \$4,000,000.
